

# Kalcor High Performance Coatings for Building Products

## Kalcor – A Right Sized Paint Company

Large enough to meet the demands of the architectural coating industry, but agile enough to get things done. Kalcor Coatings Company has a track record of providing innovative products and superior customer support.

Over its 50 year history as a formulator of customized paint and coating, Kalcor has emerged as leading supplier of coatings to the building products market.

## Kalgard® Roof Coatings

Kalcor manufactures a range of coatings formulated for beauty and durability. Utilizing waterborne Kynar Aquatec PVDF resin chemistry, these super-durable coatings provide years of fade-resistant, weatherable performance. Kalgard roof coatings are also formulated with high solar reflective pigments to provide cooler surfaces. Cooler surfaces provide greater customer comfort and affordability and also give the coating longer life without fading.

## Kalgard® Coatings for Siding

Kalcor offers an engineered line of Kalgard coatings for a broad range of siding materials and applications. From 100% urethane systems to hybrid urethane-acrylic blends, Kalcor coatings are one-component waterborne dispersions suitable for vinyl, fiberglass, polypropylene, polycarbonate and other polymeric materials.

These high performance coatings for siding are available in virtually any custom color and gloss as low as 5° Kalgard siding coatings can also be supplied in high solar reflectance versions for added customer comfort and added outdoor stability. All Kalgard siding coatings are designed for abrasion and excellent hardness and chip resistance.

Kalgard PVDF siding coatings are designed for better cleanability, less dirt pickup, superior fire retardancy, and mildew resistance for years of reliability and performance.

## Kalgard® Window & Door Coatings

Window frames, trim, and lineal components made of polymeric materials such as PVC are perfectly suited to Kalcor's Kalgard-870 line of urethane/acrylic coatings. Kalgard-870 is available in low bake formulations for ease of processing. Since color selection and match are often critical, Kalcor utilizes the most advanced mixed metal oxide (MMOx) pigment technology for superior appearance and stability.

Kalgard door paints are available in both the Kalgard-870 line and in waterborne Kynar/Aquatec formulas doors depending on your cost and performance requirements. Each version is also available in 1K and 2K systems for maximum application flexibility. Our door coatings are formulated for a combination of fade resistance, and cleanability.

## Kalgard® Cement and Block Coatings

Kalcor has developed a selection of cement block sealers and paints for the masonry construction market. These single coat applications provide excellent performance at lower film builds than many competitive products. Providing excellent hiding, and superior abrasion resistance and adhesion for long-lasting results.

Kalgard cement and block coatings are also available in high solar reflectance formulations to provide greater consumer comfort and economy.
